

Coding Curriculum for All Ages

Coding has become an essential skill that will continue to grow in importance as technology advances – After 5 years of successful coding camps at our pointe-claire locations we found that the increase in demand could easily be filled with the collaboration of our local schools & community centres.

With KIDcoders, students of all ages can develop NEW creative skills and learn to build their own apps and games.

Why KIDcoders

- ▷ Javascript & Python
- ▷ Live Instructor
- ▷ Self Paced.
- ▷ Perfect for Grades 3 - 11
- ▷ Covid-Safe Protocols

About

Over the last 5 years, KIDCoders has graduated hundreds of students ranging from no coding experience to advanced hand coders. We have developed a trusted program that has tracked the progress of our students year after year. We are able to now offer a turn-key solution for community organizations and/or local schools. With our new after-school program we are sure to fill the growing need for coding and computer science in our community.

“I Can't say enough good things about this program”

Mireille Vilain

“Kids loved it! Staff is friendly and I love the family-friendly environment”

Julie Bourbeau

Courses

Our curriculum is for ages 8 - 16 years. We have a trusted program that aides in the learning and retention process. Our program is fun and engaging for students.

Prevent boredom and build genuine interest in learning to code today with KIDCoders Academy's After-School and weekend programs.

Get in touch with KIDcoders

Whether you need help to set up a program in your school or for a creative workshop on a trial or project basis, we would be happy to discuss all the options. Contact us to find out more.
